

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

ZOÖLOGICAL BULLETIN

THE BULLETIN is a companion serial to the *Journal of Morphology*, and is designed for shorter contributions in animal morphology and general biology, with no illustrations beyond text-figures. The BULLETIN will provide the advantages hitherto best represented in the smaller German serials, such as the *Anatomische Anzeiger*.

There will be at least six numbers a year of about fifty pages each, form and style to be the same as the *Journal of Morphology*, so that articles in whole or in part can be transferred in case of need.

Contributors will receive fifty reprints of their papers without charge. Additional reprints will be furnished at reasonable rates.

The BULLETIN will differ from its German prototypes chiefly in excluding, at least for the present, bibliographical lists. Its contents will consist wholly of scientific communications. In the effort to meet the demand for early publication, it is hoped that this journal will deserve the hearty and prompt support of American zoölogists.

The editorial work will be directed by C. O. Whitman and W. M. Wheeler, assisted by a number of collaborators, whose names will appear on the title-page.

The subscription price per volume of six numbers is \$3.00; single numbers will be sold at 75 cents each.

Subscriptions may be forwarded, when more convenient, through the European agents mentioned on the first cover page, but otherwise all business communications should be addressed to the Publishers,
